WHO WE ARE

Preventing helplessness with digital mobile independence

The Covid-19 situation in Malaysia has unfortunately left many **senior citizens** living alone in a state of mental and physical isolation.

They are **cut-off** and **separated** and to some extent **helpless**. We need to give these senior citizens a “weapon” to defend themselves by helping them become more **digitally self-reliant** and **independent**.

Malaysia officially became an ageing country in 2020. We are predicted to be an aged society by 2044.

This is why we need to start today.

Our mission is to narrow the digital divide between generations through structured, volunteer-based mobile literacy programs for senior citizens.

Our goal is to impact
more than
300
senior citizens
by Jan 2022.
